

## SL-300H silver line

**300Watt**

**Two preamps with tube simulation and transistor, compressor/limiter, MLO system, DBS, Drive.**

**Taurus SL 300H** is a 300W bass head with a double input stage including both transistor and tube simulation preamps. The transistor preamp ensures great dynamics while the tube simulation one gives a warm, soft tube sound. Both preamps can be steplessly mixed offering the whole spectrum of desired sounds, from crisp and clear to slightly overdriven tube. There is also a very effective and easy to operate [MLO system](#) tone control to find the right sound quickly. The special design of the tone control enables revealing the character of the particular instrument meeting its both technical and musical parameters. Extra precise control over middle range is effected by a parametric equalizer and preamp filters switches. The bass sound can be very low but still impressively selective. Unique high quality OPTICAL LIMITER is built in for fast and noiseless operation.

**Drive**

**Punch, DBS**

**EQ.**

**Compressor**

## SPECIFICATIONS:

**Power output:** 300W RMS / 4ohm , 200W RMS / 8ohm

**Main features:** 2 preamps - tube simulation and transistors

**Inputs:** passive & active

### Controls:

**GAIN** control with overload indicator. Operating with Gain and Input Mix player can obtain sound very close to acoustic bass or fretless bass guitar. The area around knobs marked by a break-off line indicates the region where the level of compression and distortion allows achieving the desired effect.

**MIX** fluent signal adjustment of the input between 2 sections of the amplifier - tubes simulation and transistors.

**COMPRESSOR/LIMITER** to control dynamic of sound

**VOLUME** control

### Tone:

**BASS** and **TREBLE** equalizer with "[MLO-system](#)" (Middle-range Level Optimization).

**PARAMETRIC EQUALIZER** for precise control of middle range (120Hz-4kHz)

**PRESENCE** button - increases transparency of sound

**PUNCH** button - increases sonic expression

**DBS** - Dynamic Bass System, increases dynamics and selectivity of bass sound

### Other features:

**MUTE** button

**CLIP** power amp indicator

**PEAK** preamp overload indicator

**Effect loops:** AUX for serial and parallel configuration

**Protections:** short circuit, thermal overload, power overload

Forced cooling system with electronic efficiency control

**Dimensions:** 19" / 2 rackspaces (H x W x D) 88x483x290mm

**Weight:** 7.0 kg
