

Bass amplification  
**Taurus**  
Efx

*black line*

1. Input "mono-jack"
2. Output "stereo or mono-jack", or you can use standard reducing plug as shown below.
3. Power supply DC 12V/100mA. [max power consumption 60mA]
4. ON/OFF LED indicator
5. **DEPTH** - chorus depth modulation knob
6. **SPEED** - speed modulation knob.
7. **DETUNE** - detune modulation knob.
8. **ENHANCER** - extended polyphony low frequency range level knob. ENHANCER is modified only by DETUNE knob.
9. Footswitch - if it's turned off true-bypass is active on mono channel and in stereo mode right channel is turned on "active bypass mode".
